

Since when has weather and traffic info been a media possession? It is PUBLIC information and is ANY media outlet's right to pass that info on to it's listeners. It is also the PUBLIC'S right to obtain such info in whichever form it deems to be the most convenient, timely, most informative, and so on. It is in NO WAY the government's right or duty to tell the general public where it can and cannot obtain their traffic and weather reports. Stop wasting taxpayer's time and money on such absolutely frivolous topics.
